Patents

1. PAULIK, J. - PAULIK, F.: Equipment for the derivation of basic curves obtained in electrometric measurements. Hung. pat. No. 143.322/1955.
2. PAULIK, F. - PAULIK, J. - ERDEY, L.: Equipment for the simultaneous recording of derivative thermogravimetric and thermogravimetric curves. Hung. pat. No. 144.548/1954. patented in Germany, too.
3. PAULIK, F. - PAULIK, J. - ERDEY, L.: Equipment for the simultaneous recording of differential thermoanalytical, thermogravimetric and derivative thermogravimetric curves. Hung. pat. No. 145.369/1955, patented in USA, UK., France and Germany, too.
4. PAULIK, F. - PAULIK, J. - ERDEY, L.: Procedure and apparatus for the recording of distillation curves of solvents obtained in thermogravimetric way. Hung. pat. No. 146.464/1956, patented in USA, UK, France and Germany, too.
5. PAULIK, F. - PAULIK, J. - ERDEY, L. - ZAGYVAI, I.: Procedure and apparatus for the simultaneous determination of changes in the specific weight caused by the sedimentation of suspensions. Hung. pat. No. 148.711/1959, patented in USA, UK, France and Germany, too.
6. PAULIK, F. - PAULIK, J. - ERDEY, L. - ZAGYVAI, I.: Procedure and apparatus for the simultaneous determination of the weight change and rate of weight change of sediments in the case of suspensions. Hung. pat. No. 149.871/1959, patented in USA, UK, France and Germany, too.
7. PAULIK, F. - PAULIK, J. - ERDEY, L.: Procedure and apparatus for the recording of distillation curves of solvents obtained in thermogravimetric way. Hung. pat. No. 149.772/1960, patented in USA, UK, France and Germany, too.
8. PAULIK, F. - PAULIK, J. - ERDEY, L.: Procedure and apparatus for simultaneous determination of changes occurring in enthalpy, dilation and rate of dilation in powdery materials. Hung. pat. No. 150.905/1961, patented in USA, UK, France, Germany and Japan, too.
9. PAULIK, F. - PAULIK, J. - ERDEY, L.: Apparatus for the simultaneous determination of weight-, enthalpy- and dilation changes and the rate of the weight and dilation changes in powdery materials. Hung. pat. No. 150.906/1961, patented in USA, UK, France, Germany and Japan, too.
10. ERDEY, L. - PAULIK, F. - PAULIK, J.: Apparatus for the automatic control of the heating program of thermobalances in the case of the application of the method of stepwise heating. Hung. pat. No. 152.197/1962, patented in USA, UK, France, Germany, Japan, Austria, Italy and Switzerland, too.
11. PAULIK, J. - PAULIK, F. - ERDEY, L.: Sample holder for increasing the selectivity of thermoanalytical examinations. Hung. pat. No. 151.783/1963, patented in USA, UK, France, Germany, Japan, Austria, Italy and Switzerland, too.
12. SZIKRA, J. - PAULIK, F. - PAULIK, J. - ERDEY, L. - FÖLSER, J. - PAPP, F.: Recorder for the registration of the deflections of mirror instruments, Hung. pat. No. 154.720/1965, patented in USA, UK, France, Germany and Japan, too.
13. PAULIK, J. - PAULIK, F. - ERDEY, L.: Apparatus adjoinable to thermoanalytical equipments for the simultaneous and automatic determination of evolution and

- rate of evolution of gaseous decomposition products. Hung. pat. No. 154.372/1966, patented in USA, UK, France, Germany and Japan, too.
14. PAULIK, F. – PAULIK, J.: Sample holder to selective thermoanalytical examinations. Hung. pat. No. 163.305/1971, patented in Austria, Italy and Switzerland, too.
 15. BALOGH, A. – FÖLSER, J. – PAULIK, F. – PAULIK, J. – RENNER, P.: Apparatus for the electronic control of the heating rate of furnaces. Hung. pat. No. 163.306/1971.
 16. PAULIK, F. – PAULIK, J.: Apparatus for the examination of phase transitions under quasi isothermal conditions. Hung. pat. No. 163.305/1971, patented in USA, UK, France, Germany, Austria, Italy, Japan and Switzerland, too.
 17. PAULIK, J. – PAULIK, F. – ARNOLD, M. – HARTMANN, J.: Electromechanic signal-transformer for thermoanalytical equipments. Hung. pat. No. 171.475/1974.
 18. PAULIK, J. – PAULIK, F. – ARNOLD, M. – BALOGH, A.: Apparatus for the control of the heating program of thermoanalytical examinations. Hung. pat. No. 174.466/1974.
 19. PAULIK, J. – PAULIK, F. – ARNOLD, M. – HARTMANN, J. – RENNER, P.: Multi-channel recorder. Hung. pat. No. 177.470/1977, patented in Switzerland, Germany and Holland, too.
 20. INCZÉDY, J. – KRISTÓF, J. – PAULIK, F. – PAULIK, J.: Apparatus for the continuous determination of the components of gaseous decomposition products. Hung. pat. No. 174.783/1976.
 21. PAULIK, J. – PAULIK, F. – ARNOLD, M. – HARTMANN, J. – RENNER, P.: Control system for direct current motors operating as servo-motor. Hung. pat. No. 182.522/1979.
 22. PAULIK, J. – PAULIK, F. – ARNOLD, M. – HARTMANN, J. – RENNER, P.: Automatic equipment for mechanical and electronic taring of balances. Hung. pat. No. 179.698/1980.
 23. PAULIK, J. – PAULIK, F. – ARNOLD, M. – HARTMANN, J. – RENNER, P.: Equipment for the control of the sensitivity of electromagnetic balances. Hung. pat. No. 179.897/1980.
 24. PAULIK, J. – PAULIK, F. – ARNOLD, M.: Heating control system for the DTA examination of phase-transitions under quasi isothermal conditions. Hung. pat. No. 194.405/1987, patented in USA, UK, France, Germany, Switzerland, too.
 25. PAULIK, J. – PAULIK, F. – ARNOLD, M. – HUBA, J.: Specially shaped graphite heating element. Hung. pat. No. 194.469/1985.
 26. PAULIK, J. – PAULIK, F. – ARNOLD, M. – SOMOGYVÁRI, P.: On-line correction of the base-line of DTA curves by means of computer. Hung. pat. No. 199.992/1986.
 27. PAULIK, J. – PAULIK, F. – ARNOLD, M.: Equipment for the precision control of the temperature measurement with thermocouple. Hung. pat. No. 193.114/1987.
